

Lesson 7.1 How Do We Fight Viruses and Microorganisms

Vocabulary

- microorganism
- pathogen
- virus
- germ theory
- immunity
- vaccine
- antibiotic
- hygiene
- sub-microscopic
- host cell
- parasites
- penicillin

People Contributions to Science

- Louis Pasteur
- Robert Koch
- Alexander Fleming
- Ignaz Semmelweis

Information

- identify the main types of pathogens
- identify common diseases that can come from viruses
- identify common diseases that can come from bacteria
- identify common diseases that can come from protists
- identify common diseases that can come from fungi
- identify common diseases that can come from worms
- identify the basic structure of all viruses
- identify the main types of bacteria
- identify the three lines of defenses our body has to protect ourselves from parasites
- list five activities that you can do to have good hygiene
